Lorin Urbantat

Computer Science Student @ ETH Zurich · Software Engineer @ ETH-CES

lorin.urbantat@gmail.com | LinkedIn | GitHub | bruol.com

EDUCATION

ETH Zurich, MSc Computer Science 2025 - 2027
- Expected Graduation: September 2027
- Major: Data Management Systems
- **Information Security Lab (5.75)**, Computational Semantics for Natural Language Processing (5.75), Advanced Formal Language Theory (5.5)

ETH Zurich, BSc Computer Science 2021 - 2024
- Graduated August 2024, GPA 5.04 (6.0 – highest)
- **Parallel Programming (5.75)**, Numerical Methods (5.75), Analysis (5.5), Visual Computing (5.75), **Applied Computer Architecture (6)**

Waldorfschule Mülheim an der Ruhr, Abitur 2007 - 2020
- GPA 1.3 (1.0 – highest)

Deutsche Schüler Akademie 2019
- Summer school for gifted students

WORK EXPERIENCE

Information Security Lab Teaching Assistant, ETH Zurich (part-time) 2026 - Present
- Test lab exercises and host exercise sessions

Software Engineer, ETH Chair of Education Systems (part-time) 2025 - Present
- Sole engineer responsible for end-to-end development of a research-focused RAG chatbot using Next.js, Convex and Microsoft Foundry, serving 1,000 users

Software Engineer, ETH Game Technology Center (part-time) 2023 - 2025
- Morph Tales Game, Unity 3D
- Developed Unity features for Morph Tales and built a game analytics pipeline using Firebase, BigQuery and Looker Studio.

Coach, mint & pepper (part-time) 2025
- STEM and AI tutor for high school students

Calculus Teaching Assistant, ETH Zurich (part-time) 2023
- Host exercise classes, 15 - 30 students

Tutor, Waldorfschule Mülheim an der Ruhr (part-time) 2017 - 2019
- Tutorial classes (10 - 25 participants) in Math and Computer Science

PERSONAL PROJECTS & RELEVANT EXPERIENCE

Unikraft on Raspberry Pi 5, ETH Semester Project 2026
- Ported Unikraft to Raspberry Pi 5, implementing AArch64 boot, memory initialization, interrupts and timers
- Developed a cache-safe kernel reload mechanism using OpenOCD and GDB, enabling repeated deployment without power-cycling.

Flateroo, Flat sharing platform 2024 - 2025
- React Native application with real-time chat, video streaming infrastructure
- Node backend, video transcoding, HLS streaming, PostgreSQL, fly.io

OpenDemocracy, RAG Powered Voting Advice application for elections 2024

SCION Control Plane Algorithms Test Environment, Bachelor Thesis 2024
- Built a Docker-based environment and traffic generator to evaluate SCION control-plane algorithms under configurable topologies and changing link conditions.

TLDR, Lecture Summarizer (VIScon Hackathon) 2023
- Lecture summarizer using OpenAI Whisper to create searchable lecture summaries from videos

SKILLS & INTERESTS

Languages	German (native), English (fluent), French (DELF B1)
Technologies	AArch64 Assembly, C, C++, Kernel Development, TypeScript, React, Python, Java, Git, Linux, Containerization, Unity 3D, React Native, Node.js, SQL, RAG, Machine Learning, PCA
Interests	Biking, Sports, Cooking, Dancing, Singing
